

Infoblox Speakers' Biography

Craig Sanderson - Senior Director, Product Management (Security)

Craig Sanderson has worked in the IT security industry for 17 years, consulting for Cisco in the UK and Europe as well as having roles in solution architecture, product management and business development. Craig specialized in IP Voice and Video security but has a broad range of experience in network security ranging from VPN, Firewall, IPS to network admission control and DDOS mitigation. He is now the senior director of product management for Infoblox's security products

Topic: Securing DNS and Enabling a Threat Intelligence Architecture with Infoblox

- Why our unique approach to security DNS is essential in modern security architectures
- What kinds of threats are we seeing to DNS (user examples)
- How better threat intelligence enables stronger security
- How the IID acquisition enhances our portfolio
- Infoblox will become the central part of a security ecosystem of partners, enabling data sharing among various parties so you can make faster security policy decisions

Philip Parker – Technical Marketing Engineer

Philip Parker has been in networking and IT for over 20 years, including positions at Cisco and Stratacom. He has been with Infoblox for 5 years where he is now the Senior Technical Marketing Engineer specializing in DNS security. Philip is our resident technical expert in how to exploit DNS for exfiltrating data out of networks, as well as how to prevent such attacks.

Topic: DNS Tunnelling, Data Exfiltration and how to prevent data breaches over DNS

- How DNS tunnelling can get data past firewalls and out of your network
- How Infoblox Threat Analytics works to stop DNS tunnelling
- The real risk to DNS from both inside and outside the network (other top threats)
- How ADP can stop these before they affect your DNS or the networks behind it
