

Rapid7: Engineering Better Security

RAPID7'S IT SECURITY ANALYTICS SOLUTIONS ENABLE YOU TO:

- Reduce your risk of a breach
- Find the attacks you're missing
- Accelerate security improvement

Rapid7's IT security data and analytics software and services help organizations reduce the risk of a breach, detect and respond to attacks, and build effective IT security programs. With comprehensive real-time data collection, advanced correlation, and unique insight into attacker techniques, Rapid7 strengthens an enterprise's ability to defend against everything from opportunistic drive-by attacks to advanced threats.

Unlike traditional vulnerability management and incident detection technologies, Rapid7 provides visibility, monitoring, and insight across assets and users from the endpoint to the cloud. Dedicated to solving the toughest security challenges, we offer unmatched capabilities to spot intruders leveraging today's #1 attack vector: compromised credentials.

Solutions

We offer three core solutions to help you solve security's complex challenges:

Threat Exposure Management: Managing your risk of a breach starts by identifying all the places you are vulnerable to attack and systematically reducing your exposure. Our Threat Exposure Management solutions are designed to help you know your weak points, prioritize what matters most, and improve your position.

Incident Detection and Response: Security professionals now broadly agree that it's not if but when you're going to be subject to a successful attack, but how we solve this challenge is not obvious. Our Incident Detection and Response services will help you detect attacks automatically, investigate quickly, and respond confidently.

Security Advisory Services: Security teams face new challenges in keeping up with a persistent and economically-motivated attacker. Only Rapid7's Security Advisory Services apply industry expertise, data-driven analysis, and industry best practices to transform the way you manage your security programs and empower more impactful business decisions.

14

Rapid7 has 14 offices globally, spanning the Americas, EMEA, and APAC.

5,100

Rapid7 has more than 5,100 customers across 99 countries.

37%

Our solutions are used by more than 37% of the top 1,000 global organizations.

200,000

Rapid7 Metasploit is backed by an open source community of more than 200,000 members.

45

A Net Promoter Score (NPS®) of 45 puts Rapid7 among the world's leading technology companies for customer satisfaction.

Products & Services

InsightIDR gets you from compromise to containment—fast. It cuts through the noise of millions of events to find the attacker; speeds investigations 10x with data correlation and the ability to search your endpoints and data in real-time; and ends data collection and management drudgery.

InsightUBA (formerly UserInsight) helps you detect, investigate, and stop threats faster with simplified discovery of user behavior, smart detection of attacks, and fast incident response.

Logentrics is the easiest way to centralize logs in real-time and analyze machine data so you can get

answers to your security and operations questions quickly.

Nexpose® analyzes vulnerabilities, controls, and configurations to find the who, what, and where of IT security risk. It uses RealContext™ and a knowledge of the attacker's mindset to prioritize and drive risk reduction.

Metasploit® offers a clear view of how your network can be exploited, so you can focus your efforts and back up your action plan.

AppSpider™ dynamically assesses custom web, mobile, and cloud applications for vulnerabilities across all modern technologies.

Rapid7 Global Services is ready to help. Our experts share vital, real-world knowledge so that security teams can operate more efficiently and make decisions that dramatically improve the ways they solve cyber security challenges. We offer strategic services to help you build a bespoke and resilient security program, based on the specific threats to your organization and its risk profile. We can help you deploy and use our products more effectively, conduct full-scale penetration testing for compliance or security program requirements, and certify your staff in the use of our products.

Customers

Rapid7 provides products and services to a broad spectrum of customers and organizations, including some of the world's largest financial institutions, healthcare and energy providers, technology and communication companies, universities, retailers and manufacturers, as well as U.S. and other national, state, and local government agencies.

We also offer Rapid7 Voice, a program that gives customers the power to influence and learn firsthand about Rapid7 innovation with visibility into our product and services roadmap. Rapid7 Voice ensures that we're meeting customer needs – today, and in the future – and provides our customers with the opportunity to gain hands-on involvement in product development.

Partners

Rapid7 has integrated its products with an ecosystem of best-of-breed vendors such as Palo Alto Networks, Splunk, FireEye, Amazon, Microsoft, Cisco, and HP to name a few.

Community

Rapid7 is strongly committed to supporting the broader security community through its free software, open source projects, and security community events. We run the Metasploit Project, the largest open source project for penetration testing, and sponsor several other open source projects. Our free software is downloaded more than one million times per year and enhanced further by over 200,000 community users and contributors.

Rapid7 is the founding organization of the Coalition for Security Research, a not-for-profit organization established to improve security for everyone through the protection and promotion of security research.

Awards and Recognition

Rapid7 has been recognized as one of the fastest growing security companies by Frost & Sullivan and a Best Place to Work by the Boston Business Journal. Our solutions are top rated by Gartner® and SC Magazine. Our support team was presented with a Silver Stevie Award for Best Frontline Customer Service, and we received the 2015 TSIA STAR award for innovation in customer success.
